8.1 **CAPITAL CONTRIBUTIONS FOR 2021/2022**

Capital contribution shall be based on the actual demand and actual current cost that each development requires as calculated by a registered Civil Engineer and agreed to by Ugu Water Services Authority. The design shall be in terms of the Guidelines for Engineering Services and the National Building Regulations (SANS 0400).

8.2 **QUOTA**

Quota can be bought at the rate (tariff) applicable when the development was constructed.

8.3 **NUMBER OF BASIC CHARGES**

Number of Basic charges shall be based on the actual number of units for each property. The number of basic charges shall be calculated as per the Guidelines for Engineering Services and based on the number of units, unit size and consumption per unit.

9. **INDUSTRIAL EFFLUENT CHARGES**

- The charges payable by the owner or occupier, as the case may be, of the manufacturing premises for the use of the Council's sewers in respect of the discharge and conveyance therein of trade effluent from the manufacturing premises, including the use of the Council's sewage purification works for purification of the trade effluent, shall be determined in accordance with the provisions of this by-law. Accounts will be rendered as soon as possible after each period of six months ending on 31st December, or 30th June of each year and shall apply to such periods. Where during any such six monthly period there has been a change of ownership or occupancy necessitating an apportionment of the amount due to the Council, the Council will apportion the amount between the parties concerned in a manner proportionate to the quantity of trade effluent discharged during the relevant respective periods of ownership or occupancy. Nothing herein shall be construed as preventing the Council from submitting accounts on a monthly basis should such practice be considered more expedient by the Council.

The General Manager: Water Services may base the trade effluent charge as described in paragraph (p) section (a), on the highest COD of one, or more samples collected from the trade effluent sampling point.

The charge to be levied by the General Manager: Water Services in respect to trade effluent discharged into its sewers from manufacturing premises shall be assessed in accordance with the following formula: -

$$R = A + ((\text{COD}/1000) \times B)$$

WHERE

R is the rate in cents per kilolitre due to the Council.

A is the basic carriage tariff expressed in cents per kilolitre, determined annually in advance by the Council. The value of A is R 8.81

B is the basic treatment tariff expressed in cents per kilogram of COD, determined annually in advance by the Council. The value of B is R0.84

COD is the chemical oxygen demand value expressed in milligram of COD per litre of effluent recorded in snap samples of effluent collected as and when deemed fit by the General Manager: Water Services.

The charges payable by the owner or occupier will also include any other charges as may be applicable.

- A copy of the methods of chemical analysis and testing procedures used to determine the COD for the purpose of calculating the charge equation described above shall be kept available by the General Manager: Water Services for inspection by the owner or occupier of any premises concerned. The method of chemical analysis will in all respects follow the STANDARD METHODS FOR WATER ANALYSES published by the SOUTH AFRICAN BUREAU OF STANDARDS being SABS METHOD 1048 – CHEMICAL OXYGEN DEMAND OF WATER.
- In the absence of any direct measurement, the quality of trade effluent discharged into the Council's sewers from any manufacturing premises during any period shall be estimated and determined by the General Manager: Water Services by reference to the quantity of water consumed on such premises during such

period. The quantity of water consumed on such premises shall be determined by reference to the Council's water meters in the case of water obtained from the Council and by meter or by calculation in the case of water obtained from any other source, including water emerging from material processed on the premises. In determining the quantity of trade effluent so discharged, due allowance shall be made for the quality of water which it is estimated is used for domestic purposes including gardening on such premises or any other purpose not resulting in the discharge of trade effluent and for water lost by reaction or evaporation during any processes on the manufacturing premises concerned and for water present in the final products or materials produced on such premises and, generally, the District Municipality shall take into consideration such matters as will enable it to estimate for the purpose of the by-laws the quantity of trade effluent discharged as aforesaid during any given period.

Industries linked to water borne sewer will be liable for the sanitation basic fee and charges per kilolitre as per charges set, over and above the industrial effluent charge, based on the calculated quota.

10. **ACCEPTANCE OF SEWAGE DELIVERED BY ROAD HAULAGE**
